

JANUARY 2021

Does early treatment with highly effective DMT improve prognosis for people with MS?

WELCOME TO THE DELIVER-MS NEWSLETTER

Happy new year to you all. We sincerely hope you enjoyed a break over the holiday period. You could be forgiven for feeling despondent with ongoing restrictions and prevalent COVID cases.

But it was heartening to see that recruitment to DELIVER continued throughout the holiday period - mainly from our US partners. First screen and first baseline of 2021 were both in Cardiff, UK and our newly opened UK site, Coventry, is actively identifying potential participants. Several other sites are moving closer to opening. Plenty of reasons for optimism! And of course you have not been able to contain your excitement about the answers to the DELIVER Lockdown Projects from our last newsletter - but you need wait no longer (see below)!

WHAT WERE YOUR LOCKDOWN PROJECTS?

Did you guess correctly?

FINAL THOUGHTS

Thanks for all your hard work and keeping our study going through the pandemic. Let's hope we turn a corner soon and see a return of more normal times, with the chance to meet in person again.
