

APRIL 2022

Does early treatment with highly effective DMT improve prognosis for people with MS?

We welcome another new UK site this month: Dr Rice and team from Bristol. Congratulations also this month to Stoke for enrolling 5 participants in their first few weeks on the study, Swansea who hit their recruitment target, Minnesota for an amazing month, Mayo who had their first recruit and Newport who recruited after a period without activity. We reached 80% of enrolment and are so grateful for all your efforts.

TOTAL ENROLMENT

MONTHLY ENROLLMENT AS OF 18TH APRIL

2+ participants

- Buffalo (2)

1 participant

- Cardiff
- Coventry
- Edinburgh
- Mayo
- Newport
- Nottingham
- UT-Austin
- Swansea

0 participants

Can you recruit 1 or 2 next month?

NEWS AND UPDATES

- As we welcome new sites, we also sadly say goodbye to some members of the DELIVER-MS family this month:
 - We would like to extend heartfelt thanks and good wishes to Margaret Keller, Coordinator from University of Virginia who has been with us from the start, but is due to retire in May.
 - This month also sees our wonderful US biobank coordinator, Praneeta Raza, move to pastures new. We wish Praneeta and her family all the best for the next phase of their life and hope they keep in touch - we will miss you Praneeta!!

- We are in the process of applying for funds to extend DELIVER-MS to collect longer term outcomes. You can let participants reaching M36 know that this is the case. If / when funding is secured, we will be reaching out to sites and participants.

FINAL THOUGHTS:

Another important milestone this week as we reached 80% of our enrolment target. We could not have come this far without you, and now ask for a final effort to help us complete DELIVER-MS. Our sponsor, participants and public advisors, are all grateful for the work you have done so far on this important study.
