

MARCH 2022

Does early treatment with highly effective DMT improve prognosis for people with MS?

Spring is here and we are feeling optimistic. We welcome two new sites this month: welcome to Dr Kantarci and team (Mayo, USA) and Dr Kalra and team (Stoke, UK). We continue to ask sites to try to enrol 1-2 participants per month, even to the Observational arm as we inch closer to completing enrolment.

TOTAL ENROLMENT

MONTHLY ENROLLMENT AS OF 14TH MARCH

2+ participants

- Cleveland (4)
- Nottingham (4)
- Cardiff (2)
- Stoke (2)

1 participant

- Las Vegas
- Virginia
- Wisconsin
- UT-Austin
- Swansea

0 participants

Please try to do all you can to recruit this month.

NEWS AND UPDATES

- 🧠 Congratulations to Dr Leorah Freeman and Avery Largent from UT-Austin for their first enrolment to the study.
- 🧠 Dr Kalra (Stoke, UK) has wowed us by enrolling and randomising 2 participants in the first 2 weeks of being open. Dr Kantarci (Mayo, USA) has just joined this week and we look forward to working together.

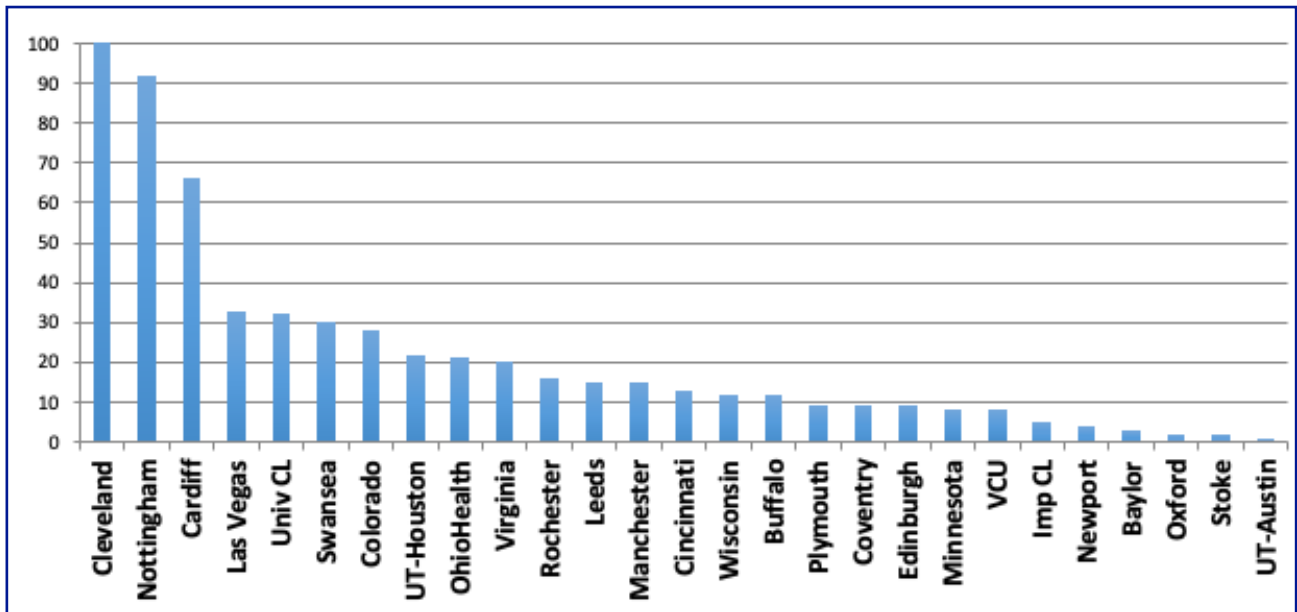

Dr Kantarci

Dr Kalra

- 🧠 Cleveland were also celebrating when they enrolled their 100th DELIVER participant! Well done Cleveland!!

FINAL THOUGHTS:

Another important milestone this week as we reached 75% of our enrolment target. We could not have come this far without you, and now ask for a final effort to help us complete DELIVER-MS. Our sponsor, participants and public advisors, are all grateful for the work you have done so far on this important study.
