Does early treatment with highly effective DMT improve prognosis for people with MS?

WELCOME TO THE DELIVER-MS NEWSLETTER

We would like to thank all the sites for their efforts on both DELIVER-MS and DELIVER-MS Long Term Extension (LTE). For DELIVER-LTE there are 16 sites that have enrolled at least one patient and 1 site pending activation. We have also started tracking patients who have already reached M48 and have not enrolled in the LTE. Please reach out if you have any questions about enrollment!

2 patients from Cardiff have transferred to Bristol and 1 from Nottingham to Leeds

REMINDERS

- Please push EVERY visit to QA-data can't be downloaded unless a visit is in QA
- Complete M36 MRIs on the DELIVER approved scanner is a must and should be done without exception in the RCT trial participants!
- MRIs in the LTE are flexible and preferred on DELIVER approved scanner if possible (will still accept MRIs if not on the DEL approved scanner)
- Please continue to update the DMT summary forms at M36
- We ask that you don't have the same pages for both main DELIVER and the LTE loaded. For example: We have modified the DMT Summary form for the LTE, so it includes the newly approved DMTs. If the visit automatically uploads the Main DELIVER DMT summary form, and you would like to use the LTE version, please delete the Main DELIVER version and upload the LTE version. There shouldn't be both versions (Main and LTE) of the same form be in a single visit, this will cause errors in the database.**

DELIVER-MS LTE ELIGIBILITY

- If a participant comes off or changes DMT, becomes pregnant, or was previously lost to follow-up and reappears they are still eligible for LTE

****SAVE THE DATE****

We will be having a DELIVER-MS End of Recruitment Webinar on July 7th from 10-11am EST. During this call we will discuss the overall recruitment into the DELIVER-MS study and summaries of the baseline and cohorts. Invitations will be sent out shortly.

FINAL THOUGHTS

We want to thank you all for your ongoing dedication to DELIVER-MS and now the LTE. Please reach out to our team if you have any questions!
