

December 2024

Does early treatment with highly effective DMT improve prognosis for people with MS?

WELCOME TO THE DELIVER-MS NEWSLETTER

We would like to thank all the sites for their efforts on both DELIVER-MS and DELIVER-MS Long Term Extension (LTE). For DELIVER-LTE there are 11 sites that have enrolled at least one patient and 2 sites pending activation. We have also started tracking patients who have already reached M48 and have not enrolled in the LTE. Please reach out if you have any questions about enrollment!

2 patients from Cardiff have transferred to Bristol and 1 from Nottingham to Leeds

REMINDERS

- Please push EVERY visit to QA-data can't be downloaded unless a visit is in QA
- Complete M36 MRIs on the DELIVER approved scanner is a must and should be done without exception in the RCT trial participants!**
- MRIs in the LTE are flexible and preferred on DELIVER approved scanner if possible
- Please continue to update the DMT summary forms at M36
- Ensuring follow-up on all patients

FINAL THOUGHTS

We want to thank you all for your ongoing dedication to DELIVER-MS and now the LTE. Please reach out to our team if you have any questions!
