

December 2025

Does early treatment with highly effective DMT improve prognosis for people with MS?

WELCOME TO THE DELIVER-MS NEWSLETTER

We would like to thank all the sites for their efforts on both DELIVER-MS and DELIVER-MS Long Term Extension (LTE). For DELIVER-LTE there are 19 sites that have enrolled at least one patient and 1 site pending activation. We have also started tracking patients who have already reached M48 and have not enrolled in the LTE. Please reach out if you have any questions about enrollment!

2 patients from Cardiff have transferred to Bristol and 1 from Nottingham to Leeds

REMINDERS

- Please push EVERY visit to QA-data can't be downloaded unless a visit is in QA
- Complete M36 MRIs on the DELIVER approved scanner is a must and should be done without exception in the all DELIVER participants
- Please ensure that observational participants complete their M36 MRI within the insurance window using the DELIVER protocol
- MRIs in the LTE are flexible and preferred on DELIVER approved scanner if possible (will still accept MRIs if not on the DEL approved scanner)
- Let us know if a participant declines the LTE
- We have IRB approval for the updated protocol/ICF that extends the study due to the PCORI funding. Documents have been sent to the sites**
- We are working on sending out the new DELIVER-LTE PCORI awards**

NEWS

We are delighted to announce the launch of a sub-study to DELIVER-MS in the UK, which will explore the utility of remotely collected clinical outcome data. Participants in DELIVER-MS UK sites (Newport, Swansea, Cardiff and Nottingham) will be doing assessments at home (25FTW, 9HPT, SDMT and EDSS), in parallel to their in-person visits at years for and beyond. We will be interested in looking at the feasibility, and concordance with in-person data.

FINAL THOUGHTS

We want to thank you all for your ongoing dedication to DELIVER-MS and now the LTE. Please reach out to our team if you have any questions!

Happy Holidays and a Happy New Year!
